

MIECHV BENCHMARKS: PM 4

WELL CHILD VISITS: FY 2020-2023

PERFORMANCE MEASURE (PM) 4 DEFINITION

Percent of TCs (target children) who received the LAST recommended well child visit in the reporting period based on the American Academy of Pediatrics (AAP) schedule

ALL HFNY MIECHV PERFORMANCE

- **About 50% of TCs** across all MIECHV programs received the last recommended well child visit in the reporting period over the last 3.5 years

DISPARITIES IN WELL CHILD VISITS (FY 2022)

Correlates of TC Receiving Last Well Child Visit

*TCs with foreign-born or Hispanic PC1s were much more likely to have received their last well child visit than TCs of non-Hispanic White PC1s**

*Groups that were not significantly different from the reference group (non-Hispanic White PC1s) are not shown.

Other Key Findings

TCs who had health insurance were more than twice as likely to receive their last well child visit.

TCs in families with adequate food, clothing, and household goods (as reported by PC1s at intake or their last follow-up visit) were 60% more likely to receive their last well child visit.
